Installation Instructions for SRM Selection Software

The SRM selection software can only be installed onto a computer which machine code has been coded into a registration file. This file will be generated by SRMTec and sent to you.

1. Machine Code

Run the machine code extraction programme:

The machine code should look similar to this:

4 机器码预	起北京	×
机器码:	BFEBFBFF000306C3.1440790200010	159006A

Send this machine to your SRMPartner and you will be returned with a registration file which is matching to the computer of this machine code.

2. De-install the old SRM software

Then manually delete the directory C:/joyeastsrm

After that the installation is finished.

On the desktop you can find the icon of SRM selection software and you can start it.

The software should run normally.
